Risk Disclosure. Financial investments carry inherent systematic risks. Speculative investment products like cryptocurrency involve increased risk exposure and may be unsuitable for inexperienced or safe-haven investors.

High-leverage investment strategies correlate with higher rewards and a greater risk of loss. While unavoidable, risk can be managed by carefully analyzing investment goals, financial positions, risk tolerances, investment experience, product knowledge or seeking the advice of a professional financial advisor.

Past investment results do not guarantee future returns. Speculative investments, including but not limited to decentralized finance, position all or part of your investment capital at risk for total loss. You should, therefore, carefully consider whether such investments are suitable for you in light of your circumstances and financial resources.

Decentralized financial investments are not covered by either FDIC or SIPC insurance in the US or any

equivalent agency worldwide. Legislative and regulatory changes or actions at the state, federal, or international level may adversely affect cryptocurrency use, transfer, exchange, and value. The funds you deposit for “staking” are not protected by insurance in the event of bankruptcy or insolvency of TRILLANT, or the event, that your funds are misappropriated.

Conclusion. Your deposits in TRILLANT are at risk of 100% daily loss. Do not use funds secured by loans as deposits or investments in TRILLANT. All funds reinvested in TRILLANT are at the risk of 100% daily loss. Therefore, only use funds to invest in TRILLANT that will not negatively impact or jeopardize your everyday life in the event of a total loss.

Pre-Launch Disclosure. TRILLANT Value Tokens purchased at the Pre-Launch price of \$0.05 are locked for 52 weeks, irrespective of the investment option selected - Buy and Hold, Short-Term Staking, or Long-Term Staking.

TRILLANT Defined

TRILLANT is a revolutionary community-driven cryptocurrency investment ecosystem founded and built on blockchain technology.

The name "TRILLANT" identifies the TRILLANT ecosystem and the TRILLANT Value Token (cryptocurrency).

The TRILLANT ecosystem consists of three founding pillars. Referred to as "**TRIPLE T**" or "**TTT**," these pillars include **TRILLANT**, **TRILLON**, and **TRILLANDO**.

- **TRILLANT** Value Token (TRI) represents the cryptocurrency financial instrument utilized for staking and generating weekly profits. The title TRILLANT also has the dual meaning of representing the TRILLANT ecosystem as a whole.
- **TRILLON** Stable Coin (TRIL) is a 1:1 stablecoin that is backed up by, and tethered to, the US Dollar. One TRIL equals one US dollar.
- **TRILLANDO** is the integrated TRILLANT marketplace solution that offers added value and opportunity for market participants. Marketplace users are connected via TRILLON blockchain, making partnerships universally transparent, tamper-proof, and easy to implement.

In today's global marketplace, companies face a unique set of challenges that may restrict growth, limit scalability, and prevent even the best products or services from reaching their intended audiences.

Entrepreneurs often emerge by specializing in their unique goods or services. As a result of their isolated and limited experience, they lack the necessary skills to remain competitive and profitable while meeting technological advancements, marketing expertise and expenses, online optimization, customer acquisition, and sales strategies. An integrated and seamless commerce system with a "win for all" factor is needed and is now at hand.

TRILLANT's marketplace solution positions and empowers all parties to focus on their core competencies. TRILLANT creates transparency, sustainable economic success, and long-term partnerships by connecting members through the TRILLANDO Marketplace and integrated blockchain services.

Successful participation in today's global market demands strong sales expertise and business development fundamentals.

Traditional business operations require interaction with multiple independent service providers, which significantly complicates business processes and increases the risk of error.

TRILLANT's complete solution approach positions all parties to focus on their core competencies.

TRILLANT Ecosystem

TRILLANT is transforming the world of finance. Moving at the speed of the internet and free of traditional regulations, TRILLANT offers an integrated commerce solution, efficiently saving you time and money.

VALUE TOKEN

STABLE PAY COIN

E-COMMERCE

TRILLANT

TRILLON

TRILLANDO

The Big Picture

The TRILLANT ecosystem is comprised of:

- **TRILLANT** - Value Token
- **TRILLON** - Stable Pay Coin
- **TRILLANDO** - Marketplace
- **EXCHANGE** - Currency Gateway
- **MEMBERS** - Affiliate or Passive
- **CUSTOMERS** - Consumers
- **MERCHANTS** - Businesses

Decentralization is a key advantage of the TRILLANT ecosystem. All members are equal, with full access to validated ledger data providing complete control over assets and transactions.

Unlocking new income opportunities, TRILLANT is the first decentralized ecosystem that integrates all factors of commerce utilizing blockchain technology.

The standard process in the ecosystem begins with earnings. Members are variably compensated and partake in generated revenues through the process of TRILLANT staking.

In addition to staking gains, income streams are available to Merchants in the TRILLANDO Marketplace through the selling of goods and services, and to Affiliate Partners through referrals.

TRILLON Pay Coin, operating as the primary payment unit within the ecosystem, ensures transaction transparency through blockchain technology.

TRILLANT DeFi investment strategies include, but are not limited to:

- A combination of DeFi strategies with algorithmic tools
- Tokenized long and short positions on lending markets to balance portfolio risks
- Automated investment yield products gathering protocol fees while managing liquidity

The TRILLANT ecosystem integrates two blockchains, providing an unprecedented service package.

"I believe that cryptocurrency and the use of blockchain technology can open up an economy to individuals and groups that have been historically excluded or ignored by the free market and financial institutions."

- Erich Ely

We are witnessing the most powerful and revolutionary economic change of all time.

Technology-driven innovation in financial services is creating a wave of disruption across the globe.

Outdated structures and services are disappearing while state-of-the-art systems are relentlessly advancing to dominate and redefine commerce as we know it.

One hundred fifty years of history reveal that fintech has played a vital role in ushering in the financial revolution.

We are now on the verge of a global financial breakthrough.

Perfect Timing

DeFi Revolution

The decentralized cryptocurrency market materialized in 2008 with the emergence of Bitcoin. With more than 20,000 unique coins, cryptocurrency has disrupted the central financial system opening the space as a free market for individuals, companies, and entrepreneurs.

Today's global cryptocurrency market cap is 1.02 Trillion Dollars.

Experts predict that the traditional banking system, as we know it today, will dissolve within 3-5 years. Regardless of the banking industry's longevity, cryptocurrency and blockchain technology are challenging the worldwide financial system.

Free enterprise and the current foundational shifts in the global economy have opened up new opportunities to seize control over personal and business finances.

Gain Control

Traditional banking institutions have been entrusted to "hold and protect" people's money for generations. However, account holders receive little or no interest in exchange, while banks use deposits for lucrative financial gains and retain 100% of their profits. The time has arrived to regain control over hard-earned personal equity and reap the deserved rewards.

The TRILLANT ecosystem changes the way people engage in commerce and personal finance.

The TRILLANT staking platform provides the opportunity to seize control over personal and business finances through a transparent, revenue-sharing blockchain banking system.

Attractive Compensation

The TRILLANT ecosystem changes the way people engage in commerce and personal finance. Unlike traditional banking systems, the profits generated from deposits are generously allocated to members based on their individual investments. A member of the TRILLANT staking platform can earn up to 50% APY on their staked deposit.

Additionally, Affiliate Partners maximize referral commissions by helping others earn profits and build wealth through TRILLANT staking.

Independent Ecosystem

TRILLANT's stand-alone ecosystem incorporates all facets of commerce, providing the ideal solution to buy and sell goods or services.

A transparent and decentralized structure ensures full-scale accountability and prevents all parties from presenting fraudulent information or unfairly using the system to their advantage.

VALUE TOKEN

TRILLANT

The TRILLANT Value Token is the central investment instrument of the TRILLANT ecosystem.

Short and Long-Term staking options generate sustainable income streams that empower token owners to regain control of their personal finances.

Buy and Hold. TRILLANT Value Tokens are digital assets that can be purchased, held on speculation, and traded for potential profit based on market indicators.

Staking Options. For the investor, staking is the passive activity of offering cryptocurrency holdings to a network for a set period, similar to deposits in a traditional bank or money market account.

In exchange for the use of staked holdings, investors receive earned interest or rewards in the form of TRILLON Stable Pay Coin.

TRILLANT operates on a proof-of-stake validation process to reduce energy, maintain blockchain integrity, and create a simple, fair, and transparent method of representing the token holder's deposit.

TRILLANT Value Token staking options include Short and Long-Term staking periods, which generate fixed weekly rewards in the form of TRILLON Stable Pay Coin.

TRILLON Stable Pay Coins purchase TRILLANT Value Tokens, which are used in Short and Long-Term Staking, which yield additional TRILLON.

Short-Term Staking. In Short-Term Staking, TRILLANT Value Tokens are staked (locked) for a specified period, yielding TRILLON Stable Pay Coins.

Short-Term Staking options include:

- **4 weeks - 1.5% Term Yield**
- **9 weeks - 3.5% Term Yield**
- **26 weeks - 11.0% Term Yield**

The TRILLANT Value Token has a built-in “buy back” function, controlling token circulation, which corresponds to deflation and sustainable price growth.

*TRILLANT Value Tokens purchased at the Pre-Launch price of \$0.05 are locked for 52 weeks, irrespective of the investment option selected - Buy and Hold, Short-Term Staking, or Long-Term Staking.

Long-Term Staking. Long-Term Staking generates sustainable income streams to benefit participants of the TRILLANT ecosystem. Long-Term Staking yields TRILLON Stable Pay Coins, which can be utilized as a payment method in the TRILLANDO Marketplace or converted to other currencies.

In Long-Term Staking, TRILLANT tokens remain locked for 52 weeks to stabilize token value and ecosystem sustainability.

Compensation in Long-Term Staking is a fixed 50% APY based on the token value at the time of staking.

At the staking period expiration, staked tokens remain as TRILLANT Value Tokens, which are then unlocked and available to the wallet holder.

A unique feature offered only in Long-Term Staking is the Option Call, which allows stakers to capture increased market values of TRILLANT every four weeks with a renewed 52-week staking term.

The TRILLANT ecosystem provides the opportunity to decide if yields are re-staked or allocated for daily expenses.

TRILLANT Tokenomics

- Ticker Trading Symbol - TRI
- ERC20 Token
- Smart Contract - Ethereum
- Max Supply - 50 Billion Tokens

STABLE PAY COIN TRILLON

TRILLON specifications include:

- Technology based on Litecoin
- Litecoin is a widespread technology; compatible with the most diverse exchanges, which is, above all else, ideal for future integration with various payment providers.
- Value stability at 1 USD
- 100% sustainably minted (eco-friendly)

All processes in sales and compensation include TRILLON as a central grounding element, providing stability as an added value and advantage.

TRILLON earning options include:

- Short or Long-Term Staking
- Affiliate Partner rewards
- TRILLANDO Marketplace commissions based on products or services

TRILLON Tokenomics

- Ticker Trading Symbol - TRIL
- Litecoin Blockchain; Kernel v0.21.2.1
- Target Supply - 20 Billion Coins
- Stablecoin - Pegged to the US dollar
- Transaction Target Speed - less than 2 minutes

Decentralized Finance

Banking Re-Imagined. As a stable digital asset with global reach, the TRILLON Stable Pay Coin transcends borders and traditional banking operations. From the convenience of a mobile device, TRILLON is easily sent to friends and family, used to pay for goods and services, or held for future use.

No bank account required.

People and businesses use TRILLON because it's a fast, safe, and more efficient way to send, spend and exchange money worldwide.

Speed. With high-performance speed and efficiency, TRILLON exceeds traditional transaction times.

Stability. TRILLON is a stablecoin pegged to the USD with a target market cap of 20 billion coins.

Simplicity. Transfer funds with ease and convenience. TRILLON has no limits and no borders. A transparent transaction ledger offers the assurance and confidence that funds have reached their final destination.

Sufficiency: TRILLON's script-based POW and fast block generation rate require low energy consumption and transaction fees.

1 TRIL = 1 USD

TRILLANDO Marketplace

TRILLANDO

THE NEW ERA OF SHOPPING

TRILLANDO Marketplace operates as a central commerce network in the TRILLANT ecosystem. The Marketplace connects Customers, Merchants and Affiliate Partners.

TRILLANDO users enjoy buying goods and services through a user-friendly interface that integrates a wide range of payment options.

Merchant registration for the Marketplace creates a unique user address in the blockchain, storing the complete transaction history.

The **TRILLANDO Marketplace** includes:

- **Customers** - purchase goods and services on the Marketplace through convenient payment methods.
- **Merchants** - after application approval, produce goods and services for placement on the Marketplace and receive automatic compensation for successful sales.
- **Affiliate Partners** - recommend goods and services to buyers and refer new Merchants with compensation received in TRILLON after a successful sale.

Listing. The cost basis of goods and services in the Marketplace shows in FIAT or TRILLON Stable Pay Coin.

Payment. Marketplace users can choose a convenient payment method for delivered goods and services, which include TRILLON or other cryptocurrencies.

E-commerce Challenges. Merchants face a number of overwhelming obstacles before successfully launching a business — from software development to marketing to sales to building a long-term customer base.

Likewise, start-up companies often encounter budget constraints for high-level technical solutions, which may lead to unmaintained or mismanaged support systems that render businesses inoperable.

Additionally, errors during the ordering process, payment, or billing undermine the customer trust cycle and present frustrating challenges that halt sales and revenue.

And while listing engines attempt to offer an economically permissible but broad range of products and services, a growing challenge exists for companies to maintain market knowledge of products and services while considering specific customer needs.

TRILLANDO offers the ideal system solution allowing Merchants to concentrate on core competencies while the TRILLANT ecosystem manages the business processes in the background.

TRILLANDO Marketplace Solutions

TRILLANDO offers Merchants a clear competitive advantage.

Synthesis. The over-arching goal of TRILLANT is to span all aspects of commerce, from producing income to achieving economic independence to the daily supply of products and services. TRILLANDO's ready-to-use e-commerce solution equips Merchants with effective business tools.

Cryptocurrency Payment Gate. The revolutionary TRILLON Stable Pay Coin is a business breakthrough for Merchants to accept and exchange cryptocurrency payments. Fast, secure, efficient, and flexible, TRILLANDO levels the playing field and opens untapped opportunities.

Software Development. With a dedicated support team and optimized user-friendly software, Merchants no longer need to commit capital for required development to handle payment processing, record keeping, or revenue distribution.

Marketing and Customer Base. Merchants gain immediate access to an international customer base and referral network. TRILLANDO's reach into global markets and communities offers the ideal touchpoints for rapid brand recognition, increased sales, and new product or service opportunities.

Technical Solutions. Merchants can focus on core business essentials while the TRILLANDO tech team offers 24/7 maintenance and covers the cost of development for IT operations, technological advancements, and system integrations.

Payment Processing. TRILLANDO's use of blockchain technology facilitates convenient real-time payment methods with back office processing and automated fund distribution.

Product Listings. Marketplace product listings are filtered for optimal placement through community-driven feedback, member surveys, product ratings, and customer product reviews.

Customers are incentivized for product suggestions and reviews to help promote, sustain, and generate commerce for the TRILLANDO Marketplace.

The Marketplace offers members the unique opportunity to exchange TRILLON earnings for goods and services.

TRILLANDO is a business game-changer for Merchants worldwide. Through fast, convenient, and efficient solutions, Merchants are now positioned to buy and sell goods or services utilizing advanced technology on their own terms.

TRILLANDO

Advantages

Customer

- Discover and enjoy a wide range selection of products and services.
- Access listing vouchers from large retail chains such as Aldi, Lidl, Walmart, Woolworth, or similar organizations abroad.
- Choose from a wide range of payment options in different currencies.
- Access worldwide products and easily make cross-border payments.
- Low service fees.
- Purchase merchandise at special prices at select Merchants with the use of the TRILLON Stable Pay Coin.
- Convenient access to buy unique goods that are not offered in all countries.
- An intuitive customer interface that connects goods and services from global economies through blockchain technology.
- Bundling of a unique assortment of goods and services in the Marketplace to cover all needs.

Affiliate Partner

- Referring Merchants to TRILLANDO Marketplace leads to a sustainable and lucrative income stream.
- Accrued compensation immediately and appropriately distributed through blockchain technology.
- Power to identify, determine, and build preferred Merchant relationships.
- Retain and spend earnings within the TRILLANT ecosystem without the exchange to fiat.
- Generate income overrides through affiliate team Merchant referrals.

Merchant

- TRILLANDO integrates an international network of Customers and Merchants. The implementation of blockchain technology enables cross-border payments, providing easy access to global markets.
- Merchants may accept cryptocurrency as an additional form of payment using the TRILLON Stable Pay Coin.
- TRILLANDO offers a ready-to-use trading platform with dedicated support, a user-friendly interface, a ready-to-use sales department, and an instant customer base.
- Merchants gain access to a complete transaction history for revenue sharing confirmation and accountability.
- The Marketplace offers multiple Merchant categories to list specific goods and services.

Premium Merchant Membership

Merchants looking to build a sustainable income stream in the TRILLANT ecosystem may take advantage of the Premium Membership to maximize benefits.

*Membership fees apply.

Premium Merchant Membership advantages include:

- Gain the merchant account feature to offer discounts and coupons.
- Premium advertisement options.

The Premium Membership offers key benefits to assist TRILLANT Merchants in building a lucrative income stream.

- Targeted advertising.
- Direct use of TRILLON Stable Pay Coin for associated Merchant fees.

Market Strategy

The intelligent connection of customers, merchants, supply chains, and distributors is essential to successful economic ventures.

Market Strategy

Revenue-Sharing Model

The vision to take TRILLANT to the world revolves around the core philosophy of a joint partnership with the TTT community. This partnership is expressed and forged through a simple and transparent revenue-sharing model.

Highly-reputable companies use referral or affiliate programs to compensate customers through revenue-sharing for new member acquisitions.

Amazon, Uber, VISA, Airbnb, eBay, Tesla, and PayPal, among other well-known companies, have proven and leveraged the efficiency of referral programs.

As part of their referral program, Airbnb members receive loyalty points on their accounts for “friend referrals.” As a result, the number of reservations in specific regions has increased by 25%.

Building wealth and income through referrals is a globally recognized principle that TRILLANT draws upon.

The philosophy of these programs is similar to the pay-for-performance principle and are becoming increasingly popular as a modern business development strategy in customer base expansion, customer retention, and brand extension.

The affiliate sector grows exponentially, with a projected cumulative global volume of 15.2 billion USD by 2024.

These revenues are generated by an estimated 148 million affiliate partners worldwide, with sales leading the way as one of the world’s most robust and fastest-growing industries. Regions with the highest independent volumes include Asia, Europe, and North America.

Traditional Affiliate Models

From a strict financial and technical viewpoint, the traditional affiliate model works as a restricted closed-loop, exclusively in favor of the parent company.

Proprietary, company-managed software is utilized to distribute revenue, removing measures of accountability in fund allocation.

Without a system of checks and balances, result tampering and exaggerated statistical data become possible.

TRILLANT’s integrated blockchain technology delivers open-source transparency to inform and protect its members.

A transparent and decentralized structure ensures full-scale accountability and prevents all parties from presenting fraudulent information or misusing the system to their advantage.

TRILLANT’s Approach

With the rise of individual independence, time flexibility, and team-centered focus, the concept of affiliate partnerships has become increasingly popular and highly successful.

TRILLANT’s revenue-sharing model offers a self-governing approach, which elicits exceptional performance-oriented results defined by fair and transparent metrics.

TRILLANT emphasizes and supports entrepreneurship by providing key resources to empower Affiliate Partners to focus solely on business-building essentials.

The TRILLANT affiliate partner model drives at the core of a unifying “We” philosophy that inspires true team spirit.

Challenges and Solutions

Centralized operations within the traditional business model pose critical challenges solved by implementing blockchain technology and building a complex affiliate referral ecosystem.

Challenges and Solutions

CHALLENGE	WITHOUT BLOCKCHAIN	WITH BLOCKCHAIN
Financial Transparency	Company owners can exclude affiliates from the financial flow and redirect revenue distribution for the company's advantage.	Public blockchain ensures transparency and control of the financial flow. Affiliates, entrepreneurs, and Merchants can verify data for revenue accountability. New members considering joining TRILLANT can review data in advance to assess economic viability.
Lack of Transparency	Affiliates may not receive their fair share of sales generated since the company solely controls the sales commission process.	The implementation of blockchain technology provides transaction transparency between participants and enables cross-border payments, expanding the company's geographic reach and user base.
Accurate Statistical Data	Companies can embellish sales data to attract new affiliates, increase sales, and boost business expansion.	Open access to valid data in the blockchain allows for a comprehensive sales analysis and affiliate activity review to optimize business processes and increase profits.
Fund Management	Companies generate sales statements using proprietary, unaudited systems or software. Affiliates have no guarantee of fund withdrawals as they do not "own" the funds and would not have the discretion of their specific use.	In a decentralized blockchain model, only wallet holders control fund access. Profit distribution among Affiliate Partners is automated with specific pre-programmed terms.
Lack of Resources	New companies can face challenges in software development, marketing, and sales strategies to attract customers. Merchants are challenged with obtaining capital or hiring resources to perform tasks and promote the sales of goods or services.	The TRILLANT ecosystem provides Merchants with the necessary tools to successfully launch a business. TRILLANT solves the problem of revenue allocation, provides a ready-to-go accounting system, and provides access to a broad international audience of customers.
Development Dependency	In the early stages of a business launch, companies tend to lack the resources to implement a successful marketing plan and develop relationships with systems developers. As a result, intellectual property rights and source code could remain under the developers' control, leading to a loss of company control.	The decentralized, open-source infrastructure of the TRILLANT ecosystem allows a team of developers access to the database, code, and technical solutions.

Members Defined

TRILLANT is the first of its kind, a self-contained crypto ecosystem built by the people, for the people.

Members. TRILLANT members are classified as Passive Members or Affiliate Partners. Through blockchain technology, members are assigned a membership code, which identifies their unique wallet address on the blockchain.

The distinction between Passive Members and Affiliate Partners is that Passive Members do not have any new member or Merchant referrals. In contrast, Affiliate Partners have at least one referral into the TRILLANT ecosystem.

Passive Member Role. TRILLANT was created with the Passive Member in mind by offering attractive and lucrative Short and Long-Term staking options. Passive Members may join TRILLANT and earn an ongoing, sustainable and recurring income without sharing the TRILLANT opportunity with others.

Affiliate Partner Role. The active contribution of Affiliate Partners to the growth and maintenance of the TRILLANT ecosystem is essential. Affiliate Partners gain a wide range of earning opportunities since they are the personalized interface to customers and the direct market.

Affiliate Partners make referrals of new members and Merchants to produce sustainable income streams. Additionally, they help to educate and inform new members while building their TRILLANT team.

The concepts of cryptocurrency and staking were initially understood only by experienced crypto investors who realized the potential. TRILLANT's growth is a direct result of the collaboration of highly-experienced leaders, their respective teams, and the company leadership.

Referral Staking Profits. Both Short and Long-Term Staking generates weekly profits of TRILLON. Affiliate Partners automatically receive a fixed percentage of referrals' weekly staking profits, down three levels. Affiliate Partners' and the respective team's performance receive compensation transparently.

Merchant Referral Commissions. In addition to staking profit compensation, Affiliate Partners are eligible to receive a percentage of profits from referred Merchants who sell goods and services in the TRILLANDO Marketplace.

The revenue-sharing model offers the TRILLANT community a wide range of earning opportunities.

"The time has come to give back to the people."

- Erich Ely

The Exchange

As an additional element of the TRILLANT ecosystem, the Exchange operates as a currency conversion gateway.

Moreover, as a projected landmark, the Exchange will provide individual IBANs and SWIFT to complete the final integration with traditional finance.

Through the Exchange, the full potential of TRILLANT is realized, which includes a direct-line connection to the TRILLANT app, cryptocurrency to FIAT exchanges, encrypted security, and the integration of traditional commerce.

- Manage digital assets and crypto wallet on the Exchange
- Advanced trading accounts offer higher transaction limits
- Encrypted security and protection
- Low transaction fees

Mobile Applications

TRILLANT Messenger Application

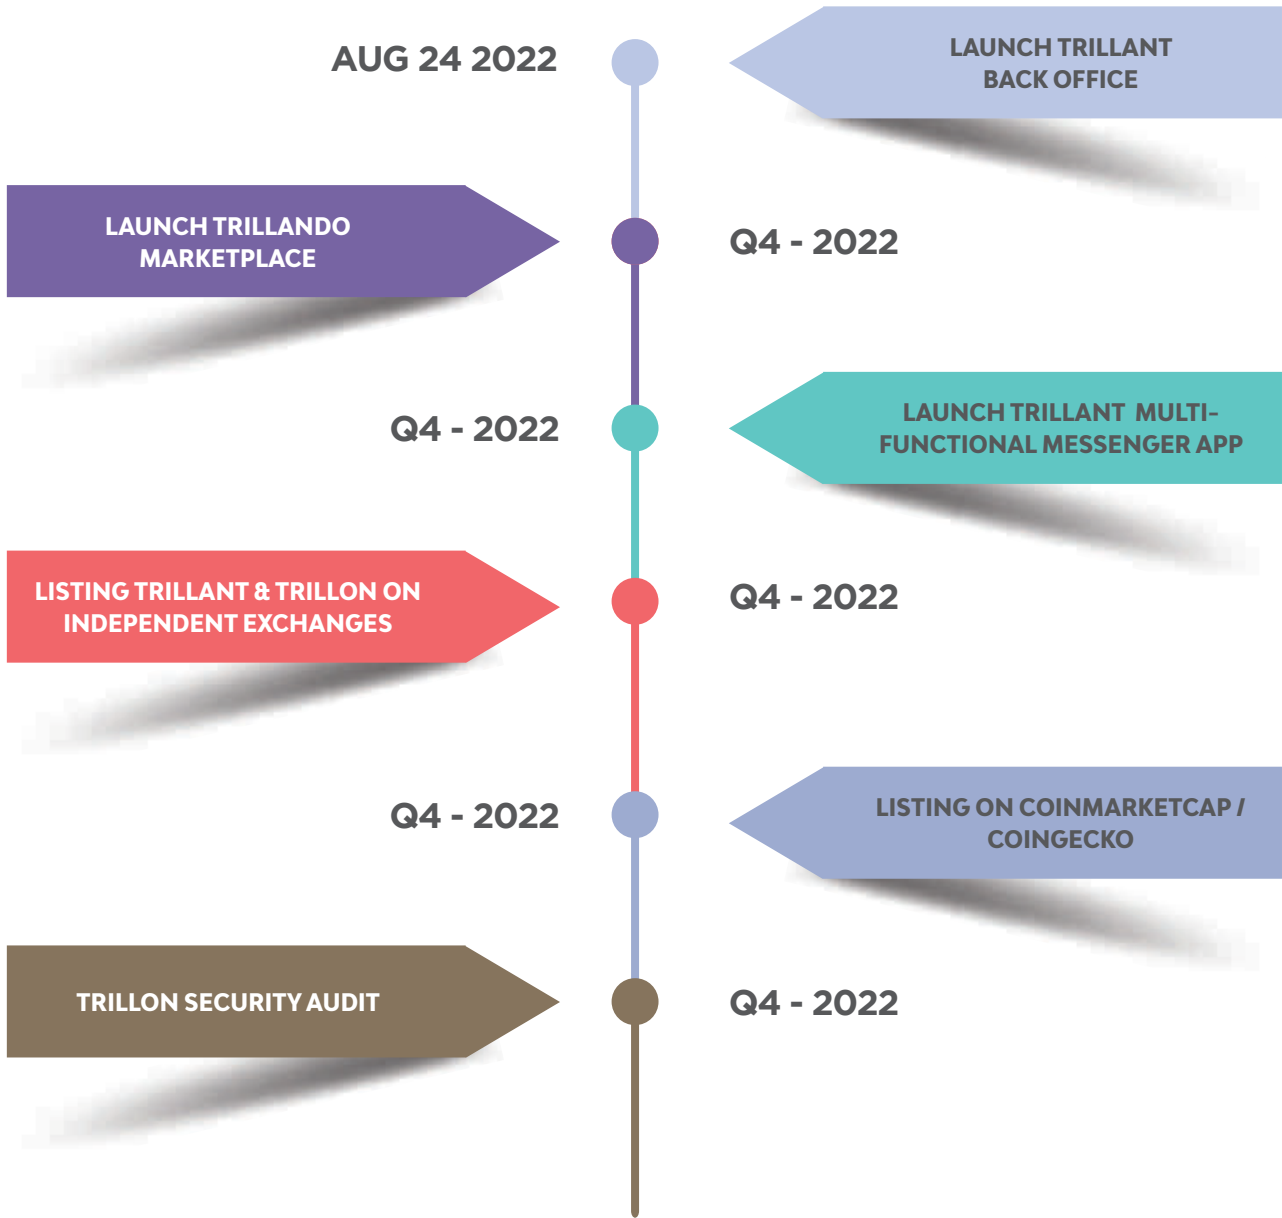

- Secure cryptocurrency payment solutions, including the TRILLON Pay Coin
- Convenient access to buy and sell products in the TRILLANDO Marketplace
- Private and secure instant messaging and email

Mobile Wallet Application

- Easily transfer and convert TRILLON into alternate currencies
- Bank to mobile-wallet connection for instant deposits
- Smartphone connection to the TRILLANT ecosystem
- Simple, intuitive, user-friendly operating system
- Encrypted wallet for smartphone users
- Safe and secure transactions

Roadmap

*"My vision is for people to find financial
independence and to live free."*

- Erich Ely

www.trillant.com
